Artisans of Devizes

CRAFTING BEAUTIFUL STONE AND TILES SINCE 1989

Artisans of Devizes is a British brand specialising in natural stone flooring, custom stone creations and luxury tiles. Our collections feature a diverse range of designs, from glazed ceramic tiles to natural marble, limestones and terrazzo, offering options for every designer.

With our in-house workshop in Wiltshire and a team of experienced designers and masons, Artisans of Devizes is dedicated to providing exceptional interior and exterior stone solutions for commercial and residential projects.

Our SS24 Collection

Introducing our Spring Summer Collection, a range of artisanal tiles spanning interior and exterior stone, porcelain, decorative, and terracotta. Key highlights include creamy limestones for seamless indoor-outdoor spaces, expanded colour options for glazed ceramic tiles, new terracotta formats, Venetian plaster effect porcelain tiles in muted colours, and authentic porcelain reproductions mimicking rustic wood and natural stone. Explore the beauty of our collection, offering a natural yet refined aesthetic for classic and contemporary projects.

Serious About Sustainability

Here at Artisans of Devizes, we are passionate about preserving our planet. We work with our suppliers to continually improve the sustainability of our tile collections, adding recycled materials and consciously looking to introduce products with recycled content each new season. We are also committed to using recyclable materials for all our packaging and are proud that our natural stone and tiles will last a lifetime, reducing the need for replacements and minimising waste.

Natural tonal variations: Medium | Availability: Usually in stock

Suitability: Domestic/heavy commercial interior walls & floors, external paving, sealing required

Due to the manufacturing process, Wansdyke Terracotta is supplied in blocks of two tiles, with a prescored line. Thanks to the brittleness of the material, the blocks can be split into two easily by hitting along the prescored line on the back of the tile. We would recommend using the edge of another tile for this purpose, or something of the same length, as this helps to apply pressure evenly along the full length of the prescored line.
