

A Warm Welcome

Hello and welcome to our world of natural stone, tiles and bespoke creations. A heritage British brand born and raised in the market town of Devizes, our small, specialist team prides itself on two things – the mastery of stone and tile craftsmanship and the joy of bringing them to homes, spaces and places near and far.

Sourcing and sculpting stone, whether natural or a meticulous reproduction, is our lifeblood. It is what we do, know and love. New design ideas, colour combinations, patterns to play with and room possibilities are endless, because every project has its very own stone story to tell. Our team is simply here to help you narrate it.

Think of today's Artisans of Devizes as stone without limits. Why majestically tile a hallway but leave the staircase out of the equation when we can source a stone, clad it, and transform it into a staircase like no other? Why not say yes to a bespoke stone sink and shower tray that are as beautiful as the tiles that surround them? This is high-end, earthborn stone, unparalleled craftsmanship unleashed to allow the finer details to take centre stage and set your project apart.

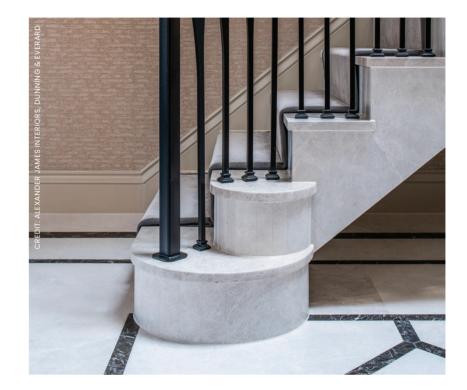

BESPOKE STONE BY ARTISANS

No two projects are ever the same, and nor are two people's imaginations. That is fundamentally what our bespoke service aims to serve.

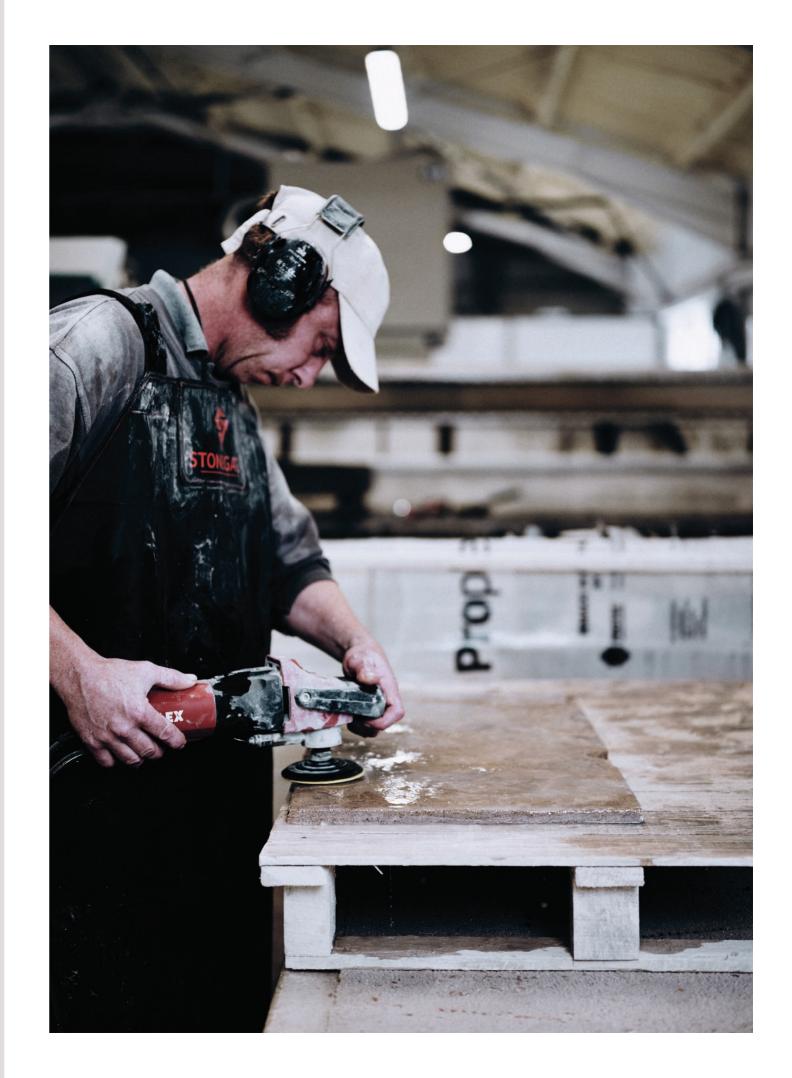

Precise, deeply perfected, artisan-produced made-tomeasure stone means that we can design, make and install to your exact requirements. From rare stone varieties sourced from lesser-known quarries transformed into statement kitchen worktops to slabs of marble sculpted into sublime shower trays, choosing the bespoke route promises results that truly are tailor-made.

OUR WORKSHOP

We are the proud owners of our very own bespoke workshop here in Wiltshire. This means that it is principally our hands and our hands alone that are involved in the making of your bespoke stone.

By carefully combining traditional hand-skills and the latest precision technology such as water jet-cutting and laser templating, the result is a unique stone creation designed to stand the test of time.

Our Stone

SPECIALLY SOURCED STONE

Few things excite us more than the search for the finest cuts of natural stone, which we are proudly able to promise to our clients thanks to our direct relationships with the world's specialist quarries. Ours is a decades-old network slowly and carefully built up over time, spanning countries and continents.

If there is a particular stone that you are keen to feature in your project, you can rely on our stone sourcing experts to locate it and transform it into a creation that will last a lifetime.

SUSTAINABLY SOURCED STONE

We pride ourselves on our environmentally-conscious practices that can be seen and felt from sourcing and manufacturing through to packaging and delivery. But that's only the beginning.

Working with natural stone means that respect for our planet and its finite resources is a given. Whether marble, limestone or granite, one of stone's greatest beauties is that it does not wear out. It only wears in. Stone is sustainably-minded by its very nature, growing in character and richness as time goes by.

Staying power? Always. Throwaway thinking? Never.

Our Services

OUR BESPOKE SERVICE - THREE SIMPLE STEPS

01

Your One-to-One Consultation

It all begins with a design consultation. Our stone experts will work with you on a one-to-one basis to gain a deep understanding of your vision to ensure our way of designing is as tailored to you as the commission itself. Our discussions will be creative but practical too, striking a balance that leads to your perfect stone match.

02

Our Tailored Templating Service

To ensure your bespoke design is as precise as possible, we can either work with your own technical drawings or arrange for one of our experts to visit to laser template the area. So that we can do this to our meticulous standards, for horizontal templating (like countertops and bath surrounds), the area needs to be plastered and with surrounding furniture, sinks or hobs in their final positions. Having your brassware chosen at this point is beneficial too to confirm positions and dimensions.

03

Fabrication and Finishing

To work as closely to your bespoke stone as possible, we built an in-house workshop that is purely dedicated to personal commissions. That means we can take care of every step of your stone's journey from sourcing through to sending it out to its final home. Being entirely in our care means we can process and install bespoke orders in as little as 3-4 weeks.

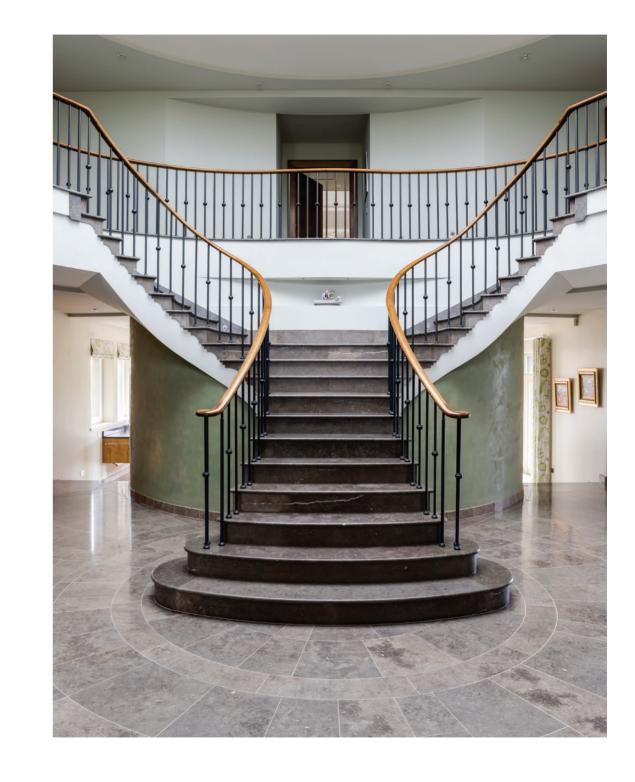

Trat Trat

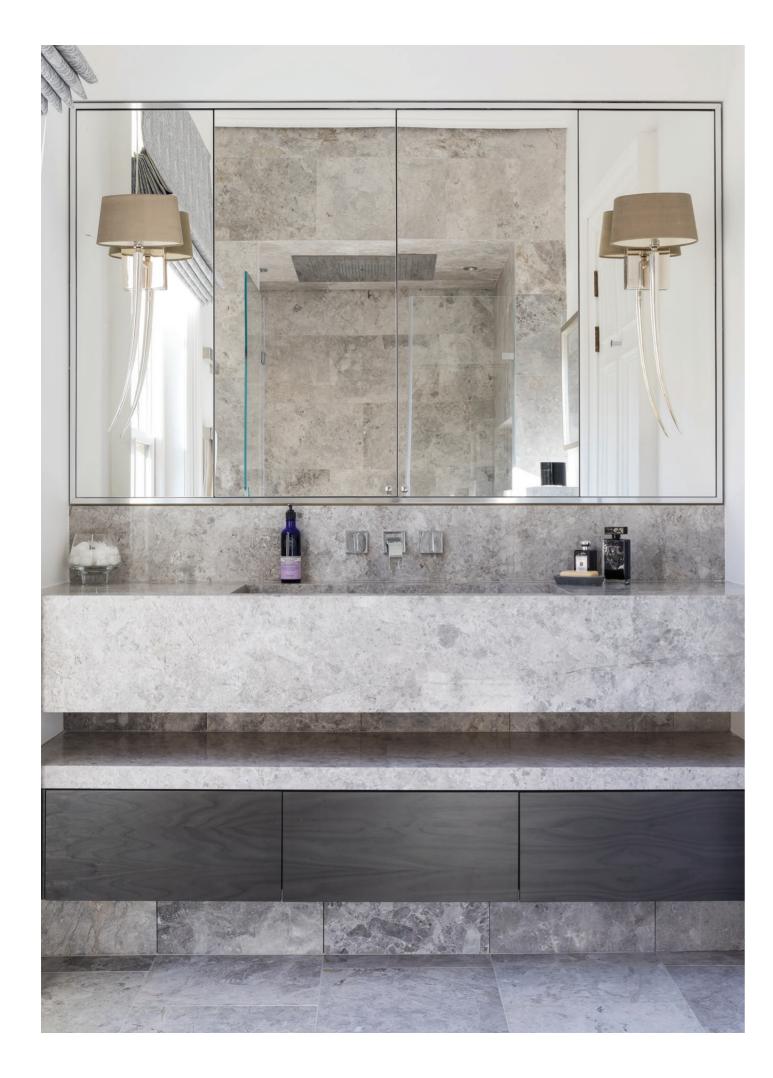

STAIRCASES

One of the most sublime expressions of natural stone is when it is impeccably carved into a gravitydefying staircase. In fact, it is one of the bespoke projects that we delight in most here at Artisans. We feel it shows our deep understanding of how to get the very best out of each type of stone, unleashing potential and enhancing beauty.

Our designers will work with you to understand your vision, advising on which specific stones will best perform, whether in a spiral, cantilevered or floating design. From here, we will look at treads, rails and banisters that might complement your stone staircase before handcrafting it in our workshop to your exacting requirements.

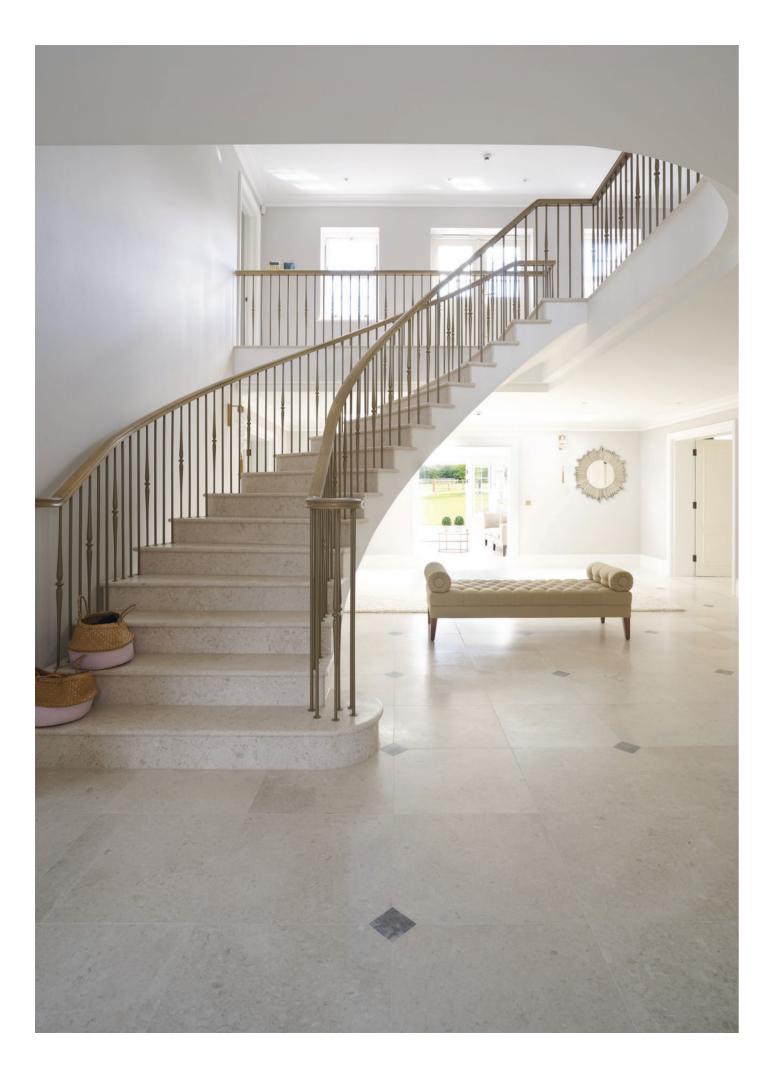

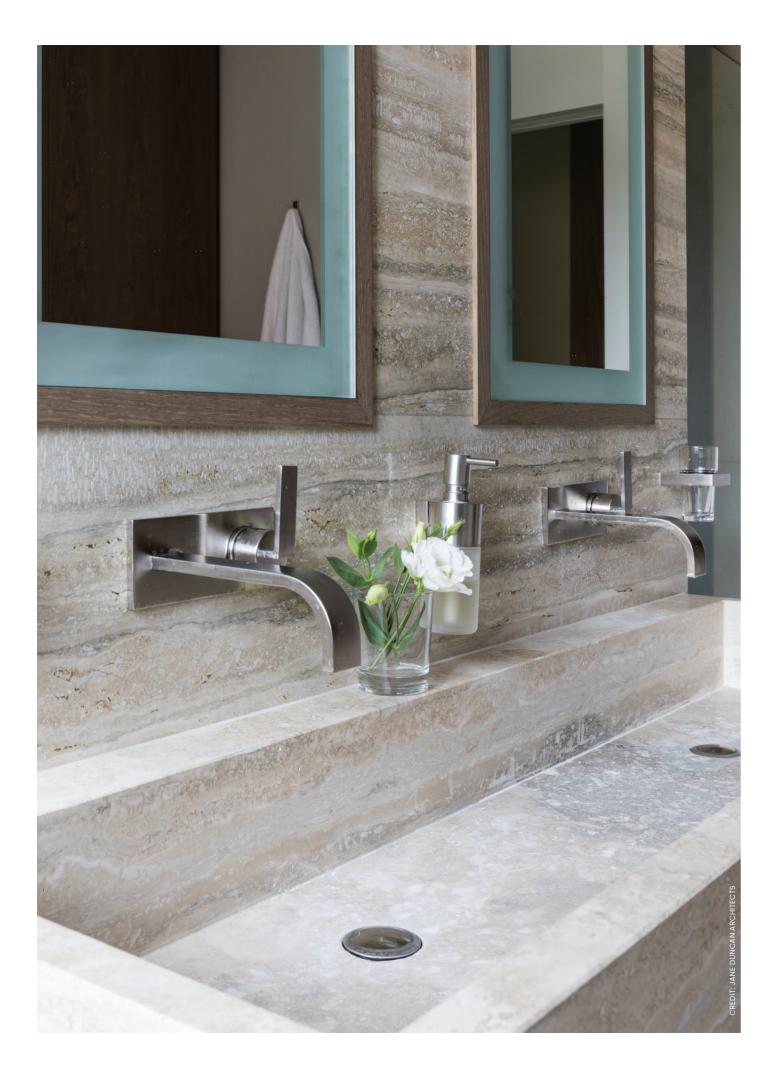

PREMIUM STONES

No two natural stones are ever quite the same, a trait that is very much part of their beauty. But for an even more unique experience, we can source large format stone slabs for you to create breathtaking stone floors, countertops, bath surrounds or as feature walls.

In our Devizes stoneyard you can explore a small selection of our premium bespoke stones that range from rare forms of marble to luxurious onyx. But thanks to our worldwide network of specialist stone quarries, we can gladly source many stones more. Simply speak to one of our specialists about what you are envisaging and we shall scour the earth to locate your perfect stone.

TABLETOPS & CONSOLE TABLES

WATERJET CUTTING

INDOOR & OUTDOOR STEPS, TREADS & COPINGS

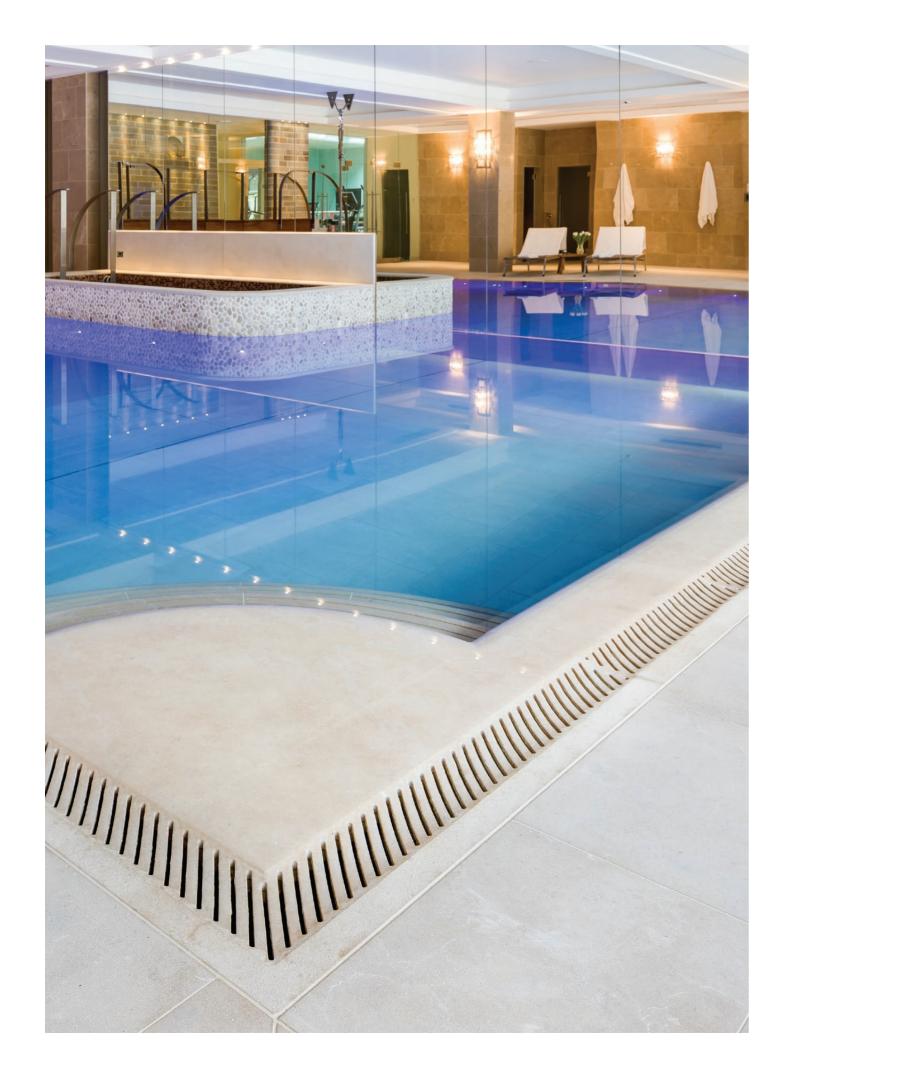

BESPOKE OPTIONS

Here at Artisans of Devices, we believe that every site and every space deserves the finest detail. But there are certain projects where a heightened sense of luxury is at the very top of the brief.

One such is the swimming pool, and another, the spa – two places from which you re-emerge revitalised. And we would like to think the stone and tiles found within play an important role in the experience.

From wall capping and seating areas to handrails, step treads and drainage grills, our expertise goes far beyond the minimum pool and spa requirements. This is where bespoke wishes are answered without a stone left unturned or a detail spared.

All it takes is a visit from one of our Project Consultants to do a full site survey, and we can take care of the rest – digital templating, technical drawings, and naturally the making of and the installation of the ideas you so wanted to bring to life.

Bespoke Slab Directory

Natural limestone, slate and marble tiles are just the start when it comes to our highly curated collection of natural stone. Here we list our premium bespoke stones that we hold in our stone yard. Each with its own rich character, tonal colour palette and tempting texture, find here the material that speaks to you most.
