AVENTURAS COLLECTION

A collaboration with fabric designer Zoe Glencross

Inspired by sun-drenched cities like Seville, Lisbon, Palma and Porto, Aventuras is a celebration of pattern, colour and heritage. Blending Moorish Mudéjar motifs and Portuguese Azulejo traditions, each tile tells a story of artisanal craft reimagined for contemporary interiors.

In partnership with British designer Zoe Glencross, we've transformed four of her signature textile prints into porcelain tiles, designed for creative freedom on both walls and floors.

THE DESIGNER

From retail buying to designing seven fabric collections, Zoe Glencross has always had an eye for pattern and colour. After discovering printmaking later in life, she launched her fabric brand from the kitchen table, combining craft, nature and narrative.

“I’m passionate about creating pattern-led designs that bring character to interiors. Translating my prints into tiles with Ca’ Pietra has been an adventure in itself.”

THE INSPIRATION

The Aventuras range draws directly from Zoe’s travels through southern Europe.

“The Palma Sol design was inspired by the rose window in Palma Cathedral and the tiled walls of Porto’s Bento station. Terracotta and ochre tones came from the old towns of Seville and Palma, while Lisbon and Porto gave us those beautiful, fresh blues.”

With each pattern, you’ll find subtle imperfections that echo hand-carved lino blocks and screen-printed textures – intentional, organic, and full of soul.

THE COLOUR STORIES

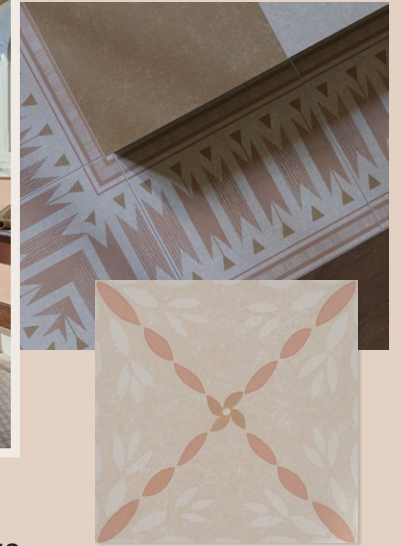

The collection comes in three thoughtfully curated colourways, each one with its own mood.

ROOM MEASUREMENT INSTRUCTIONS FOR CAD TILING LAYOUT

Please carefully measure your room and provide the following details so we can create an accurate CAD layout for your tiling. Use a tape measure and record all dimensions in millimetres.

Important: Measure every wall and feature accurately – do not assume symmetry or standard sizes.

REQUIRED MEASUREMENTS:

- **Perimeter:** Measure each wall length around the room. Include any recesses or protrusions.
- **Doorways:** Measure the width and depth of each doorway recess. Mark exact location on the wall (distance from corner).
- **Architraves:** Note any architraves inside the room. Measure how far they protrude into the room.
- **Staircases:** Note location of any stairs. Include the position and size of any newel posts or trims that extend into the floor space.
- **Fixed Features:** Include anything that affects tiling layout, such as low walls, boxed pipework, or columns.

ADDITIONAL REQUIREMENTS:

- ✓ **Sketch:** Provide a simple sketch of the room showing all measurements and clearly labelled features.
- ✓ **Photographs:** Include clear photos of the room from multiple angles. Make sure to capture all corners, doorways, and any features that affect the floor space.
- ✓ **Design brief:** Please let us know the tiles you wish included within the design, outlining of the border designs that you us to work with.

If you're unsure about any part of this, please contact us before sending.

Once we have your measurements and photographs, we will contact you if we require anything further.

The designers will then create a master plan for you, so you can confirm it is correct before we start creating a designing that is unique to your space.
